Section 1: Each question is worth 0.9 points

1. It was a thrilling movie, full of suspense and _____ moments.
A) dramatic B) trendy C) fashionable D) silent
2. To _____ something means to separate it into pieces by force.
A) snap B) crash C) rip D) tear
B)
3. It is a _____ for students to wear uniforms in many schools.
A) tradition B) law C) routine D) action
4. While the children _____ their homework, they noticed their internet connection _____ unstable.
A) were doing/was B) did/were C) was doing/were D) were doing/is
5. She donates money to _____ organizations and helped build _____ new hospital in her hometown.
A) the/a B) the/the C) a/a D) -/a
6. There's the friend _____ helped me with my project last week.
A) who B) where C) which D) what
7. The teacher suggested visiting the museum _____ it was near the school.
A) even though B) as C) thus D) however

Technology has changed the way we live our daily lives. From smartphones to self-driving cars, these innovations have made life more convenient. However, some people argue that we have become too dependent on technology, losing important skills like problem-solving and creativity. Experts suggest balancing technology use with time spent on activities that stimulate critical thinking.

8. Technology has changed our lives by making them _____.
A) more difficult B) less convenient C) more convenient D) unchanged
9. According to the passage, experts believe that _____.
A) people should avoid technology completely
B) technology helps us become more creative
C) we should balance technology use with other activities
D) technology has no effect on problem-solving skills
10. Find the word from the passage meaning "rely too much on."
A) balance B) dependent C) critical D) creative

Section 2: Each question is worth 1.5 points

The cheetah is known as the fastest land animal, capable of running at speeds of up to 75 miles per hour. This incredible speed allows it to catch prey quickly. However, cheetahs can only maintain this speed for short distances due to the amount of energy required. After a high-speed chase, they need to rest before attempting another hunt.

11. Cheetahs must be _____ fast because they can reach such high speeds.
A) incredibly B) somewhat C) slightly D) barely

12. After chasing their prey, cheetahs _____ time to recover.
A) take B) make C) spend D) are taking
13. _____, cheetahs can't maintain their top speed for long.
A) Because B) Therefore C) Although D) However
14. According to the passage, cheetahs need rest because _____.
A) they use a lot of energy B) they become bored
C) they lose interest in hunting D) their speed is too dangerous

Disappointments are a part of life, and we (15) _____ feel upset about every little failure. (16) _____ it's important to reflect on them and find ways to improve. After all, we can always do better next time! Learn from what went wrong, (17) _____ use that experience to grow in the future.

15. A) can't B) don't have to C) shouldn't D) mustn't
16. A) And B) so C) but D) because
17. A) and B) so C) but D) because
18. I' _____ compliments on my project by my teacher last week.
A) have given B) had given C) was given D) 'm given

Forests play a vital role in maintaining the Earth's ecological balance. They absorb carbon dioxide, produce oxygen, and provide habitat for countless species. However, deforestation is a growing problem due to human activities such as logging, agriculture, and urban development. This destruction not only threatens wildlife but also contributes to climate change. Many organizations are working to protect and restore forests by promoting sustainable practices and reforestation projects.

19. According to the passage, forests are important because they _____.
A) produce carbon dioxide B) absorb oxygen
C) help maintain the Earth's ecological balance D) increase urban development
20. The main cause of deforestation is _____.
A) lack of rainfall B) human activities
C) wildlife migration D) climate change

Section 3: Each question is worth 2.6 points

21. Some skateboarders love performing flips and other _____.
A) techniques
B) obstacles
C) stunts
D) routines
22. Restate the sentence: "The problem will continue unless we take action."
A) The problem will end if we act.
B) The problem will continue if we don't act.
C) Taking action will cause more problems.
D) We need problems to continue taking action.

23. Restate the sentence: "She struggles to make decisions quickly."
A) She takes a long time to choose.
B) She makes decisions easily.
C) She avoids making choices.
D) She finds it simple to decide.
24. Find the incorrect sentence:
A) The chef prepared an amazing dinner last night.
B) If I were you, I'd visit that museum.
C) I've lived in three cities by the time I was 20.
D) They were planning a trip when the storm hit.
25. Find the incorrect sentence:
A) If he could travel anywhere, he'd visit Japan.
B) The car stopped working because it ran out of gas.
C) Cows are more productive when they are named.
D) They'll bite your feet if you take off your shoes!
26. I get ____ well with my teammates, although we don't have a lot in ____.
A) on/in B) in/on C) on/at D) at/in
27. To call off means _____.
A) to delay B) to tolerate C) to cancel D) to arrange

The human brain is incredibly adaptable, constantly forming new connections between neurons. This process, known as neuroplasticity, allows the brain to change and reorganize itself throughout a person's life. For example, if someone loses their sight, the brain adapts by enhancing other senses such as hearing and touch. Scientists are studying neuroplasticity to better understand how learning, memory, and recovery from brain injuries work.

28. Neuroplasticity is the brain's ability to _____.
A) stop forming new connections
B) remain unchanged
C) adapt and reorganize itself
D) lose neurons over time
29. The passage suggests that if a person loses their sight, the brain _____.
A) becomes less active
B) loses other senses
C) enhances other senses
D) stops forming new connections
30. Scientists study neuroplasticity to understand how _____.
A) the brain is damaged
B) learning and memory work
C) neurons remain unchanged
D) sight loss affects memory
